

AIM

To explore the role of an effective framework to improve the utilization rate of young researchers' projects

METHOD

Over a year ago, PAEDS ACP set up a Research Unit Meeting comprising of 3 elements:

 Working Committee Composition of Senior Clinician Lead, Research Administrative Lead, Finance Lead •Grant Review Committee Composition of senior Management people

Information

Regular updates on grant balance, award period, project utilization rate

Processes

Lay down •Terms and Conditions •Calendar of reporting •Schedule of meetings with awardees Accountability to Grant Review Committee

To provide meaningful information, we organized data in the SAP system using a "Mapping" feature in the Grant Management Module.

Advantages:

1.By 'mapping' ie defining a "Parent" Grant (given to the Institution) and pairing it to the "Child" projects awarded within the Institution, we can easily read off the balance of the "Parent" Grant that is available for awarding in the next Grant Call. Without so adapting this mapping feature, the monitoring of the available grant balance will be done by summing up the specified projects' Budgets that are awarded against the specified Grant received.

2.Facilitates the comparison of the active grant period of the "Parent" against the in-house "Child" grants. This review facilitates the triggering of grant extension of the Parent Grant, if necessary.

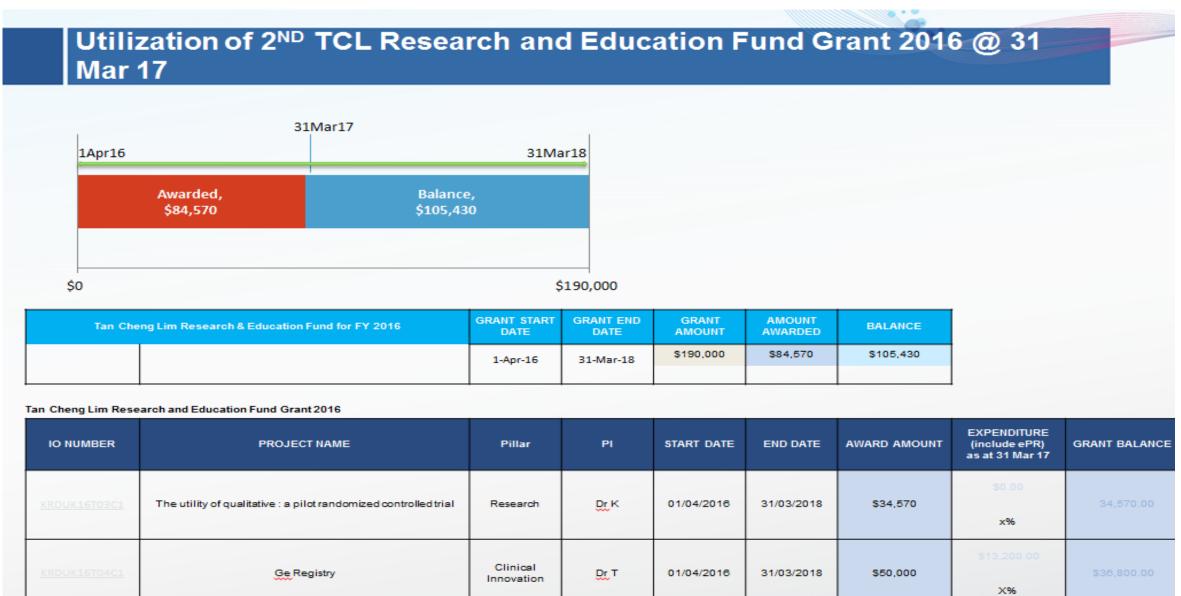

RESULTS

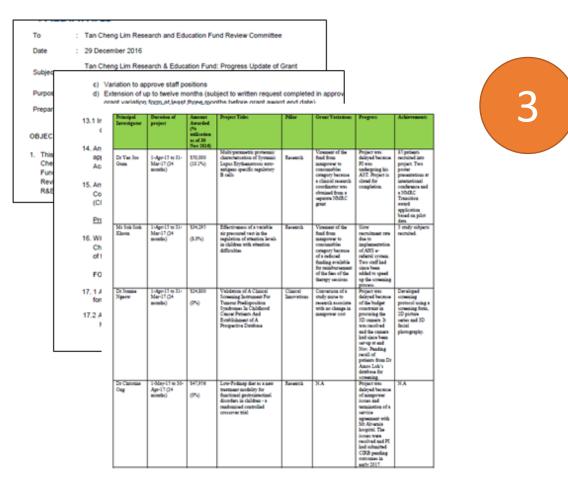

Utilization Report at end of Year 1:

Utilizatio	on Report at end of Year 2:
Utilizatio	n of 1 ^{s⊤} Tan Cheng Lim Research and Education Fun
@ 31 Mar	17

Using the information from Grant Module, we provided bimonthly simple and meaningful report and presented it at meetings

Sample:

And followed–up with a biennial report to the **Review Committee**

\$84,570

The utilization rate after a year of projects start date was only 0.3%. Due to the projects' sluggish start, we implemented this framework in late FY15.

The utilization rate at end of Year 2, ie after about fifteen months of implementation of the framework, was 37%.

Utilization rate went from 0.3% to 37% in the year. We observed that this was partly due to the natural progression of activities but mostly to the structured approach to monitoring and keeping tab of the projects' progress. The framework provided an agile approach to research management and an effective interaction platform with the younger PIs.

CONCLUSION

The 3 basic elements of an effective Structure, regular provision of timely **Information** and welldefined **Processes** do provide an impetus to support young researchers in moving their project activities.

Secondly, there are rooms to optimize existing IT tools to improve data management and reporting.

Impetus to young researchers project growth
