## Background – Issue of Asset Tag

Medical Devices are tagged as they have to be recorded in the Company's Fixed Asset Register.

### 3 Working Days

### Effects on delayed issue of Asset Tag

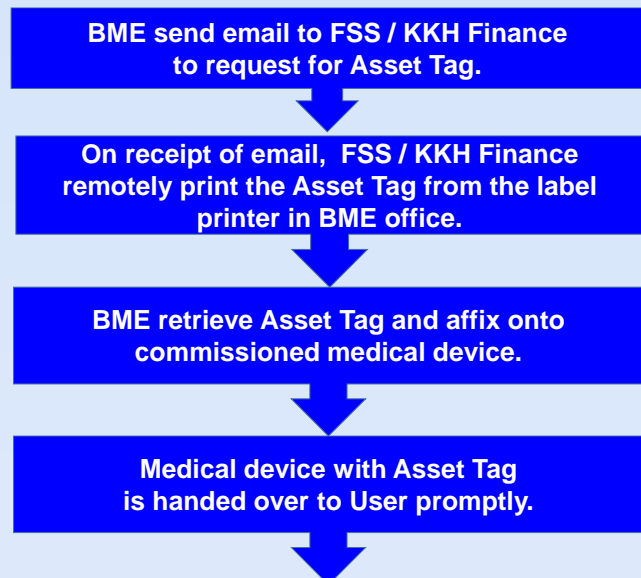

Delayed release  
of commissioned medical  
device to User

Need to make another trip  
to User Dept to tag bulky or  
mounted medical device

Unable to tag Homecare  
medical device before  
patient is discharged

## Solution – 1 working day

In Oct 2014, a label printer was installed in BME office for remote printing of Finance Asset Tag.

## Conclusion

**Asset Tag**  
issued within one  
working day and  
medical device is  
tagged promptly
