

Singapore Healthcare Management 2016

Quick and open access to resources to facilitate Doctors' accreditation to administer sedation

KK Women's and Children's Hospital
SingHealth

Jackie Ng
A/Prof Agnes Ng
Tan Ping Yang

Daphne Chan

Aim

1. Facilitate Doctors' accreditation to administer sedation by granting quick access to resources
2. Eliminate the time consuming process of userid creation, password assignment, course enrollment and liaisons undertaken by the various support teams

Methodology

KKH Sedation eLearning course was originally developed by KKH Sedation Committee and SingHealth Academy in Year 2009 and housed in the Blackboard Learning Management System (Blackboard). This platform requires userids creation, password assignment and course enrollment.

Various support functions are required before Doctors can access Blackboard.

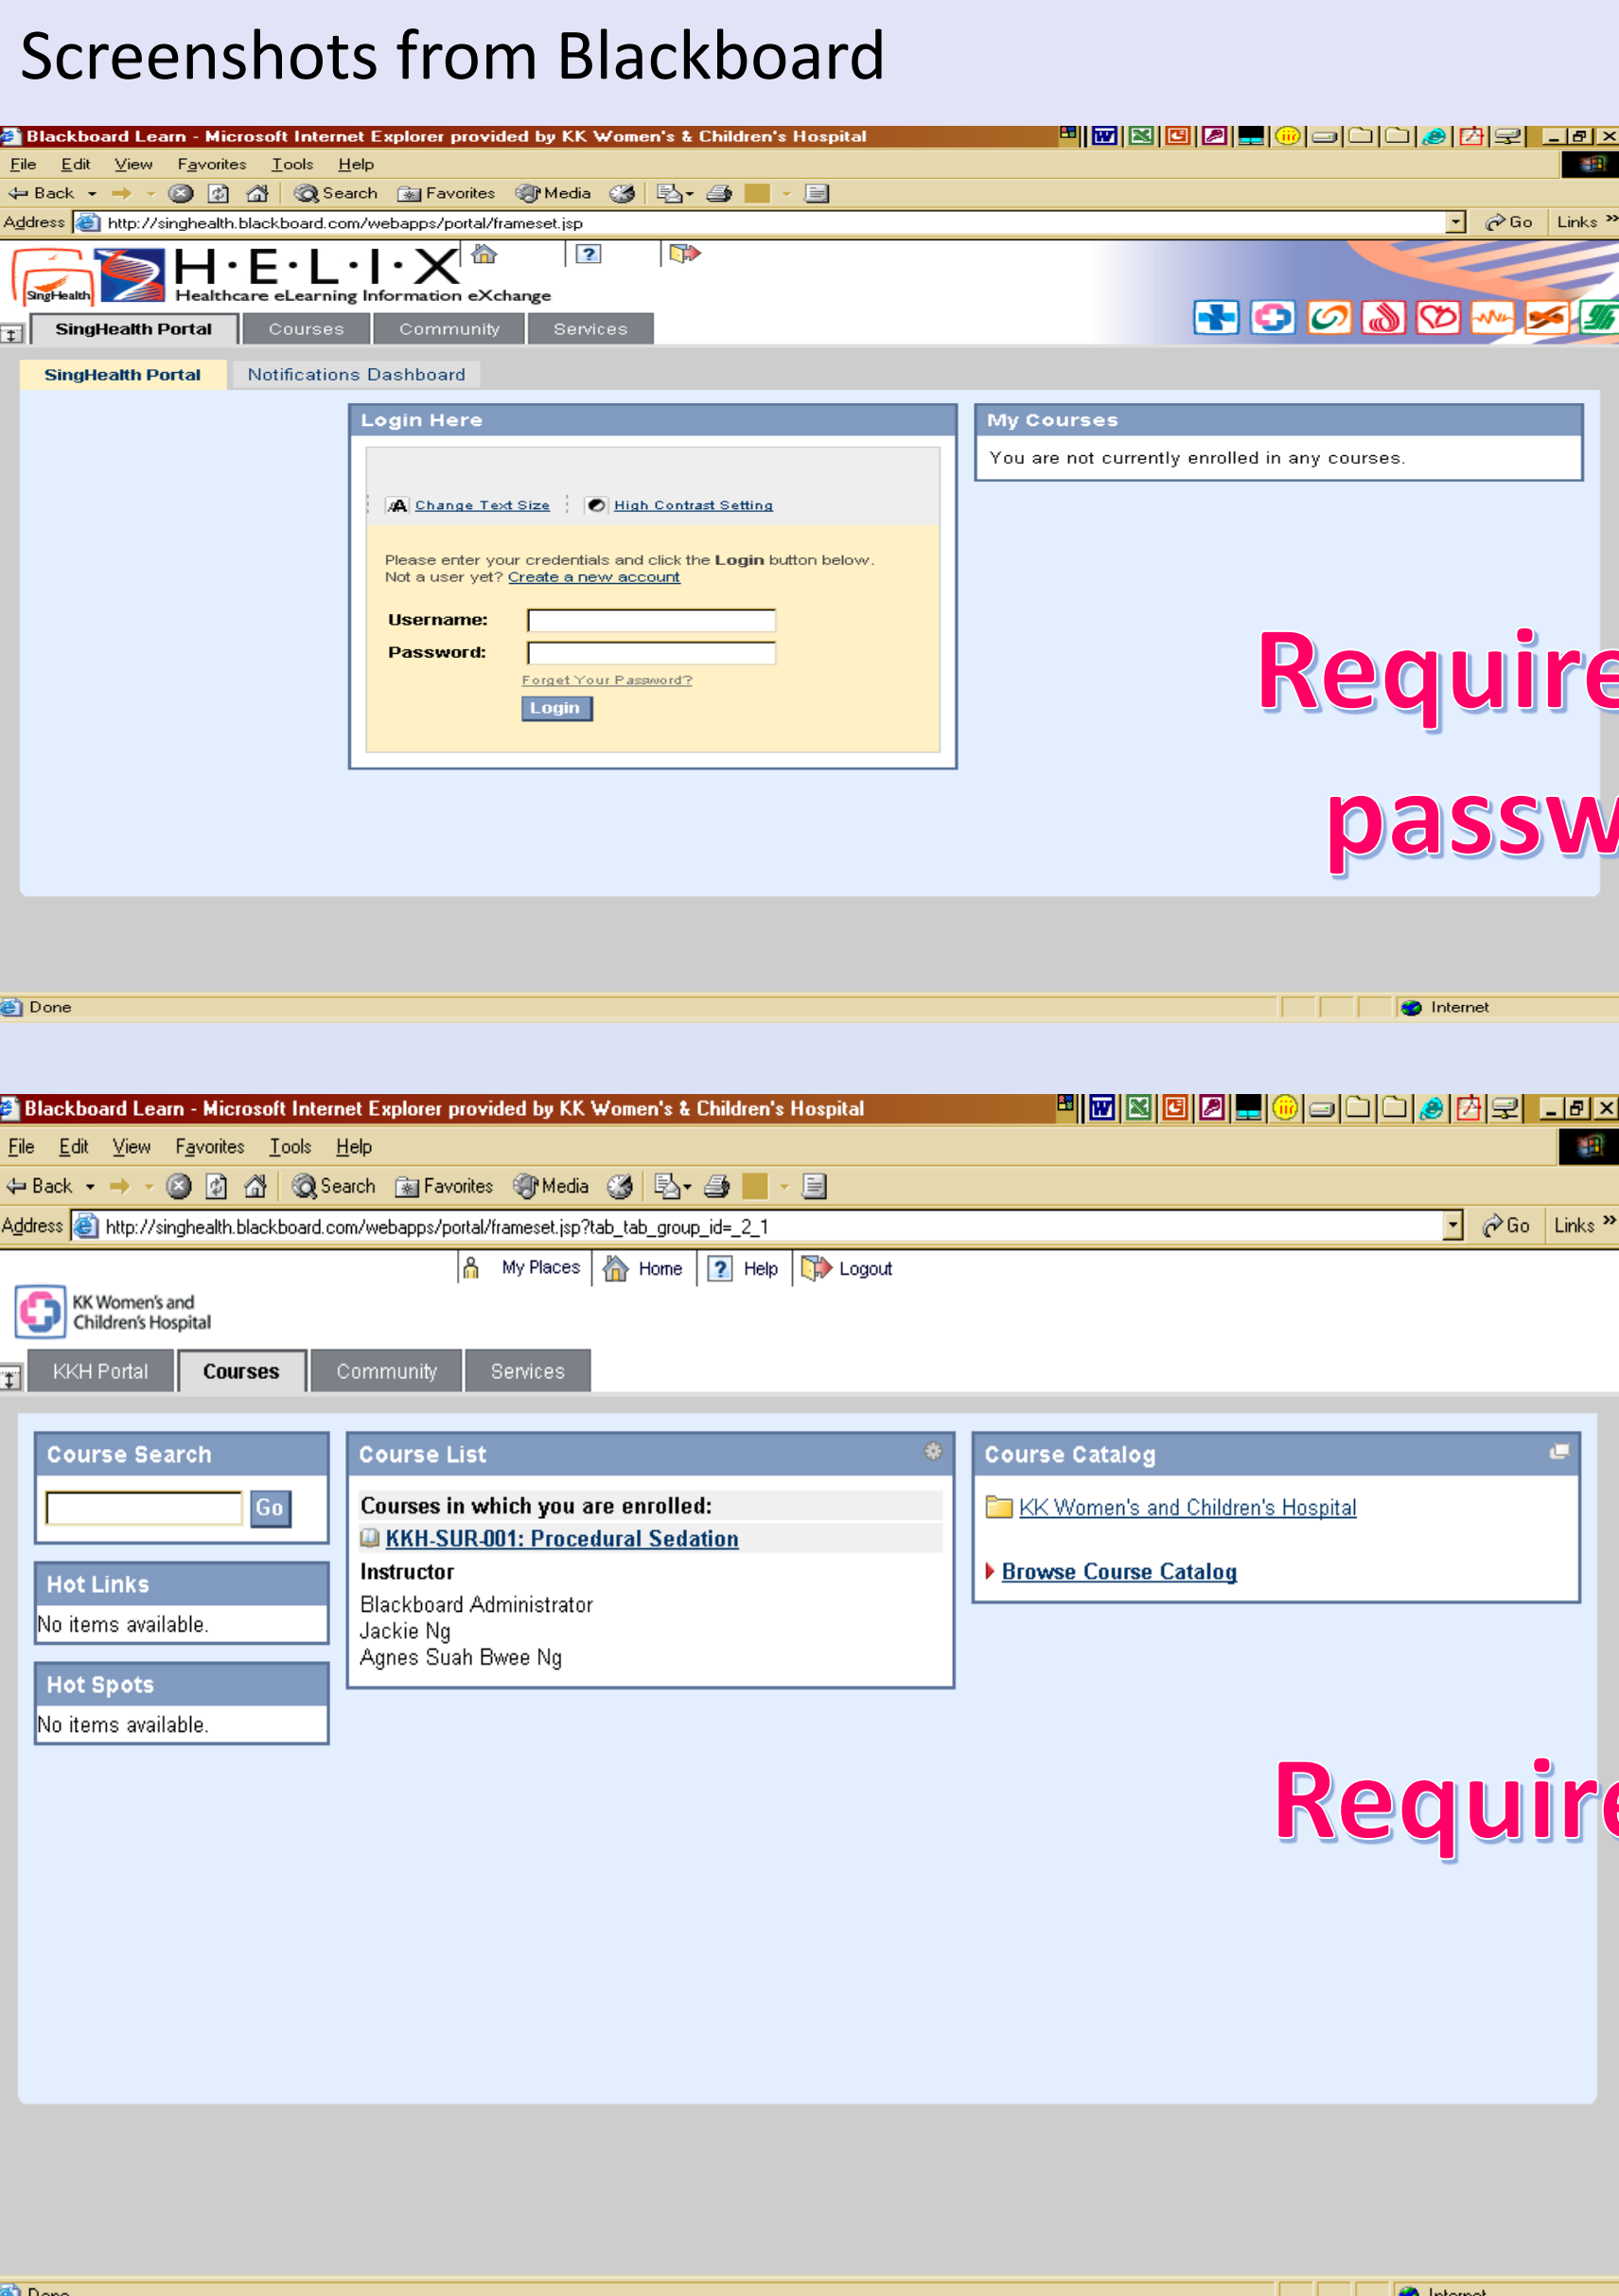

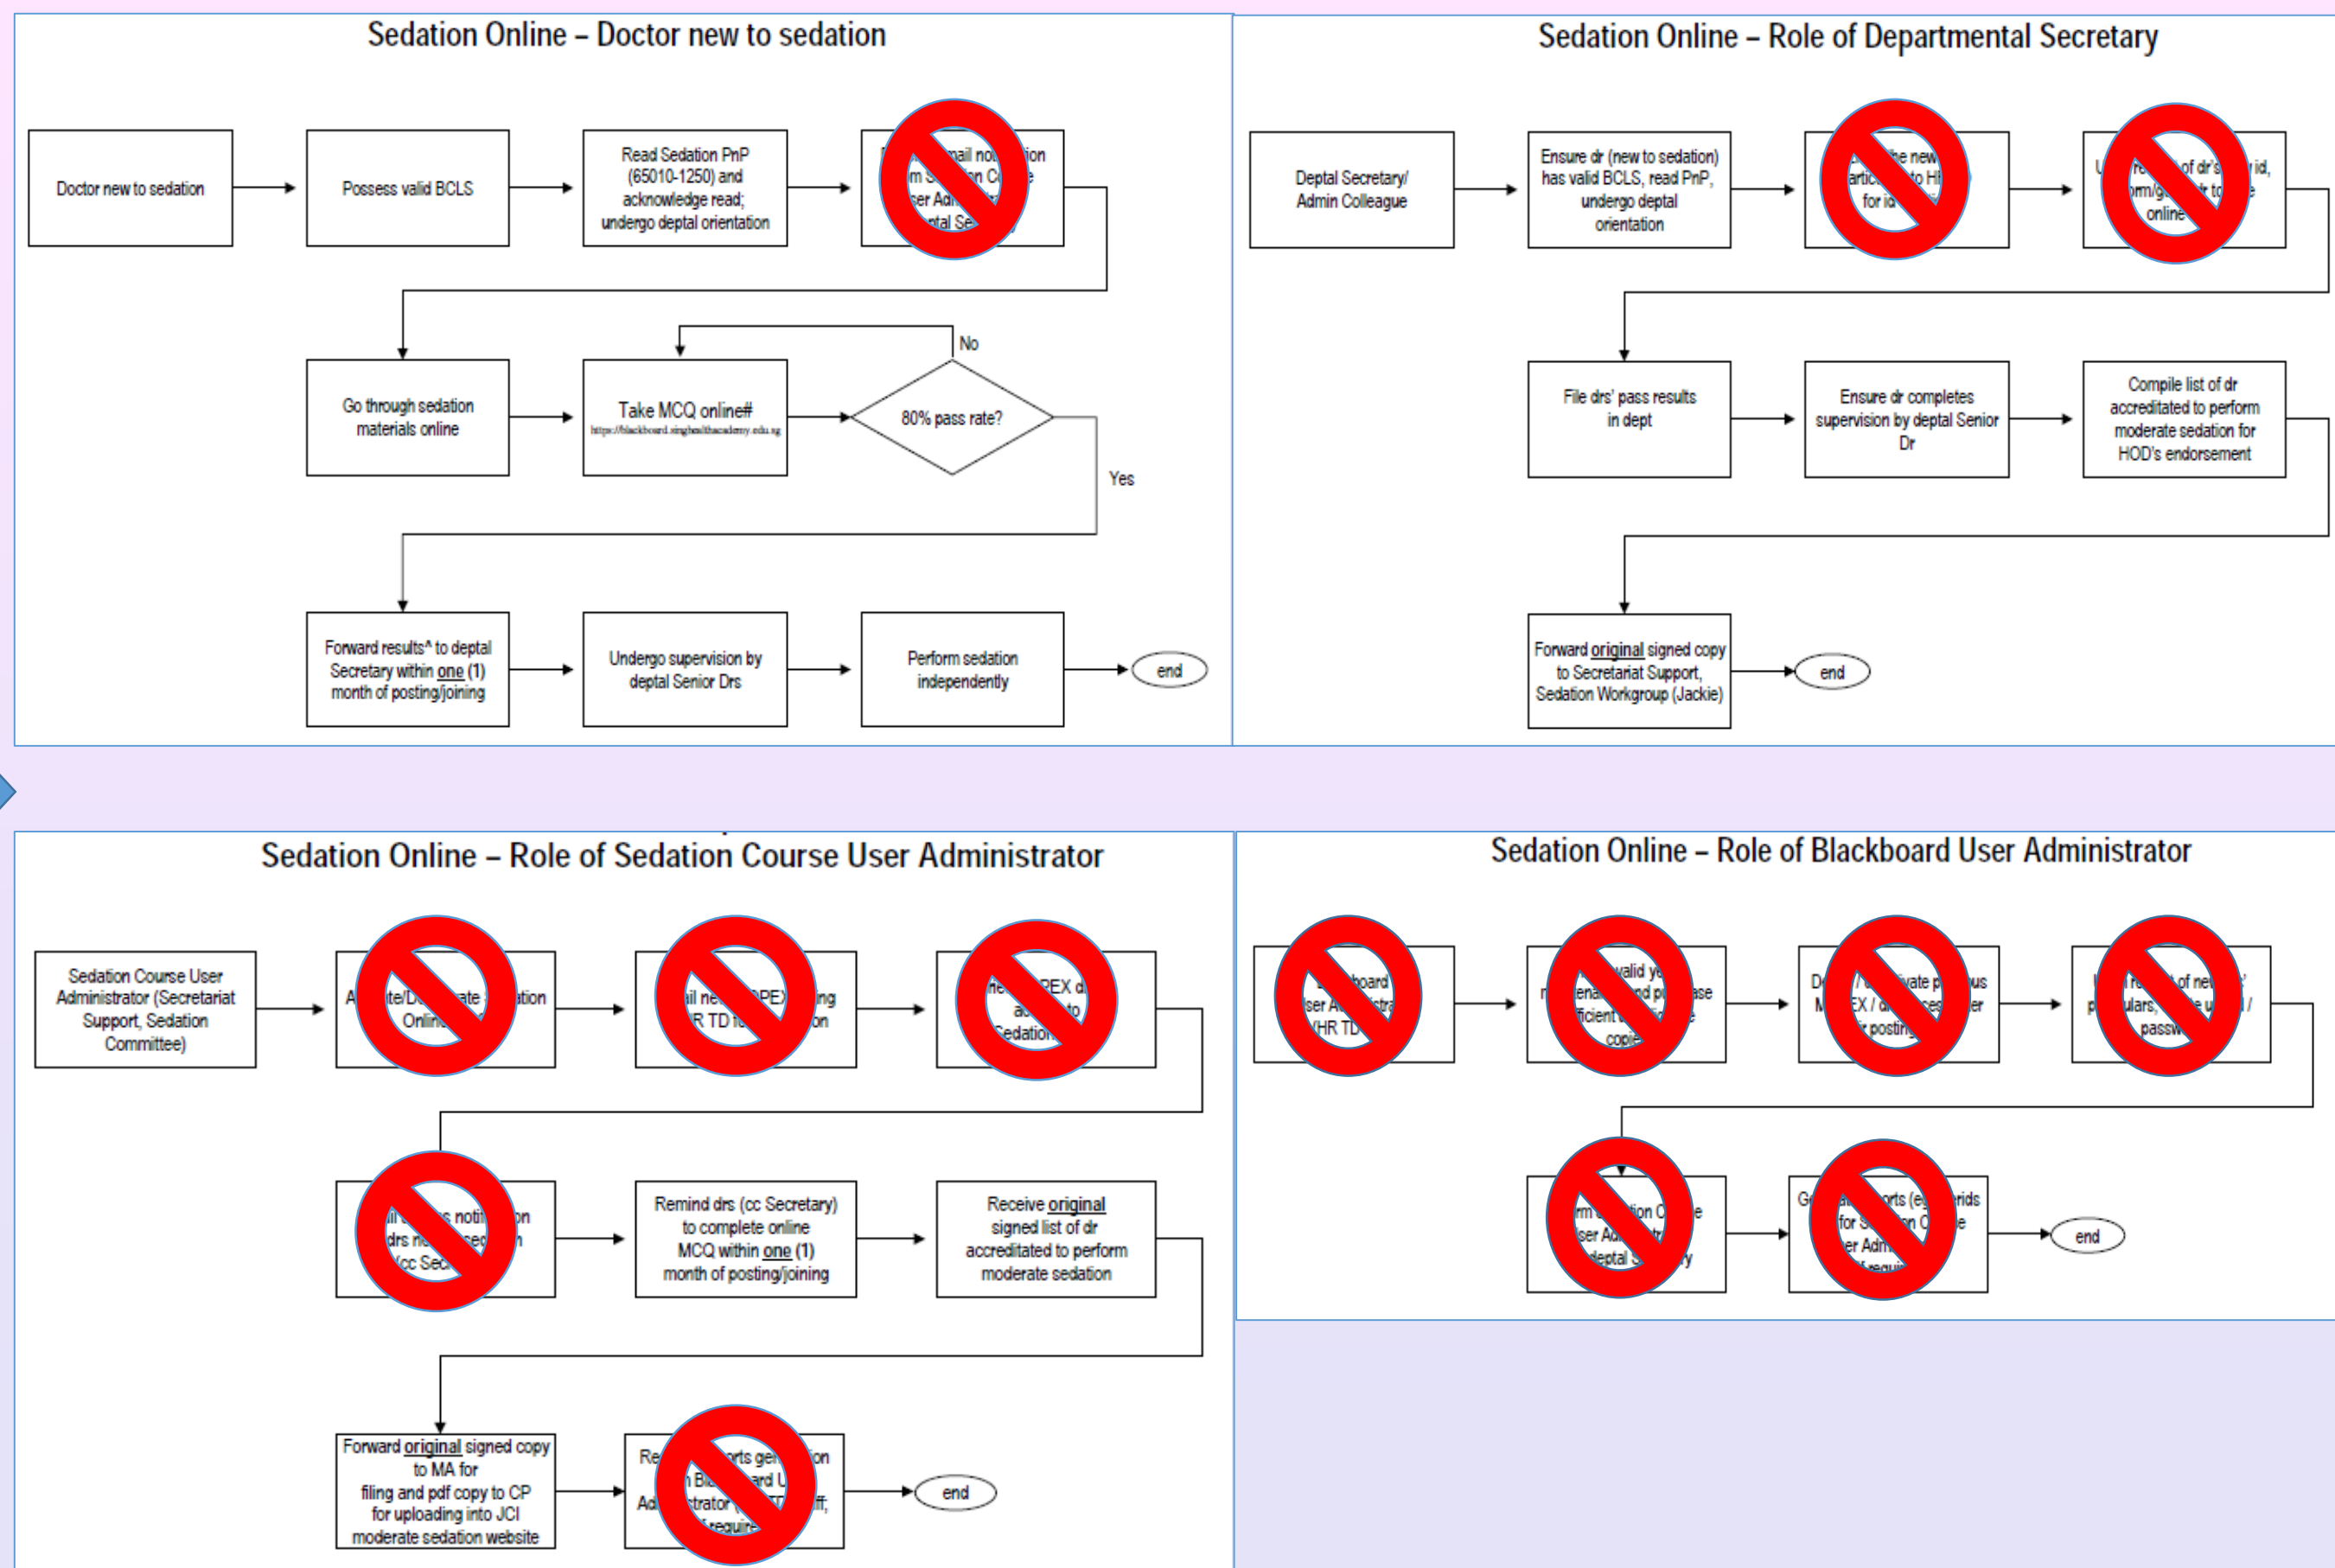

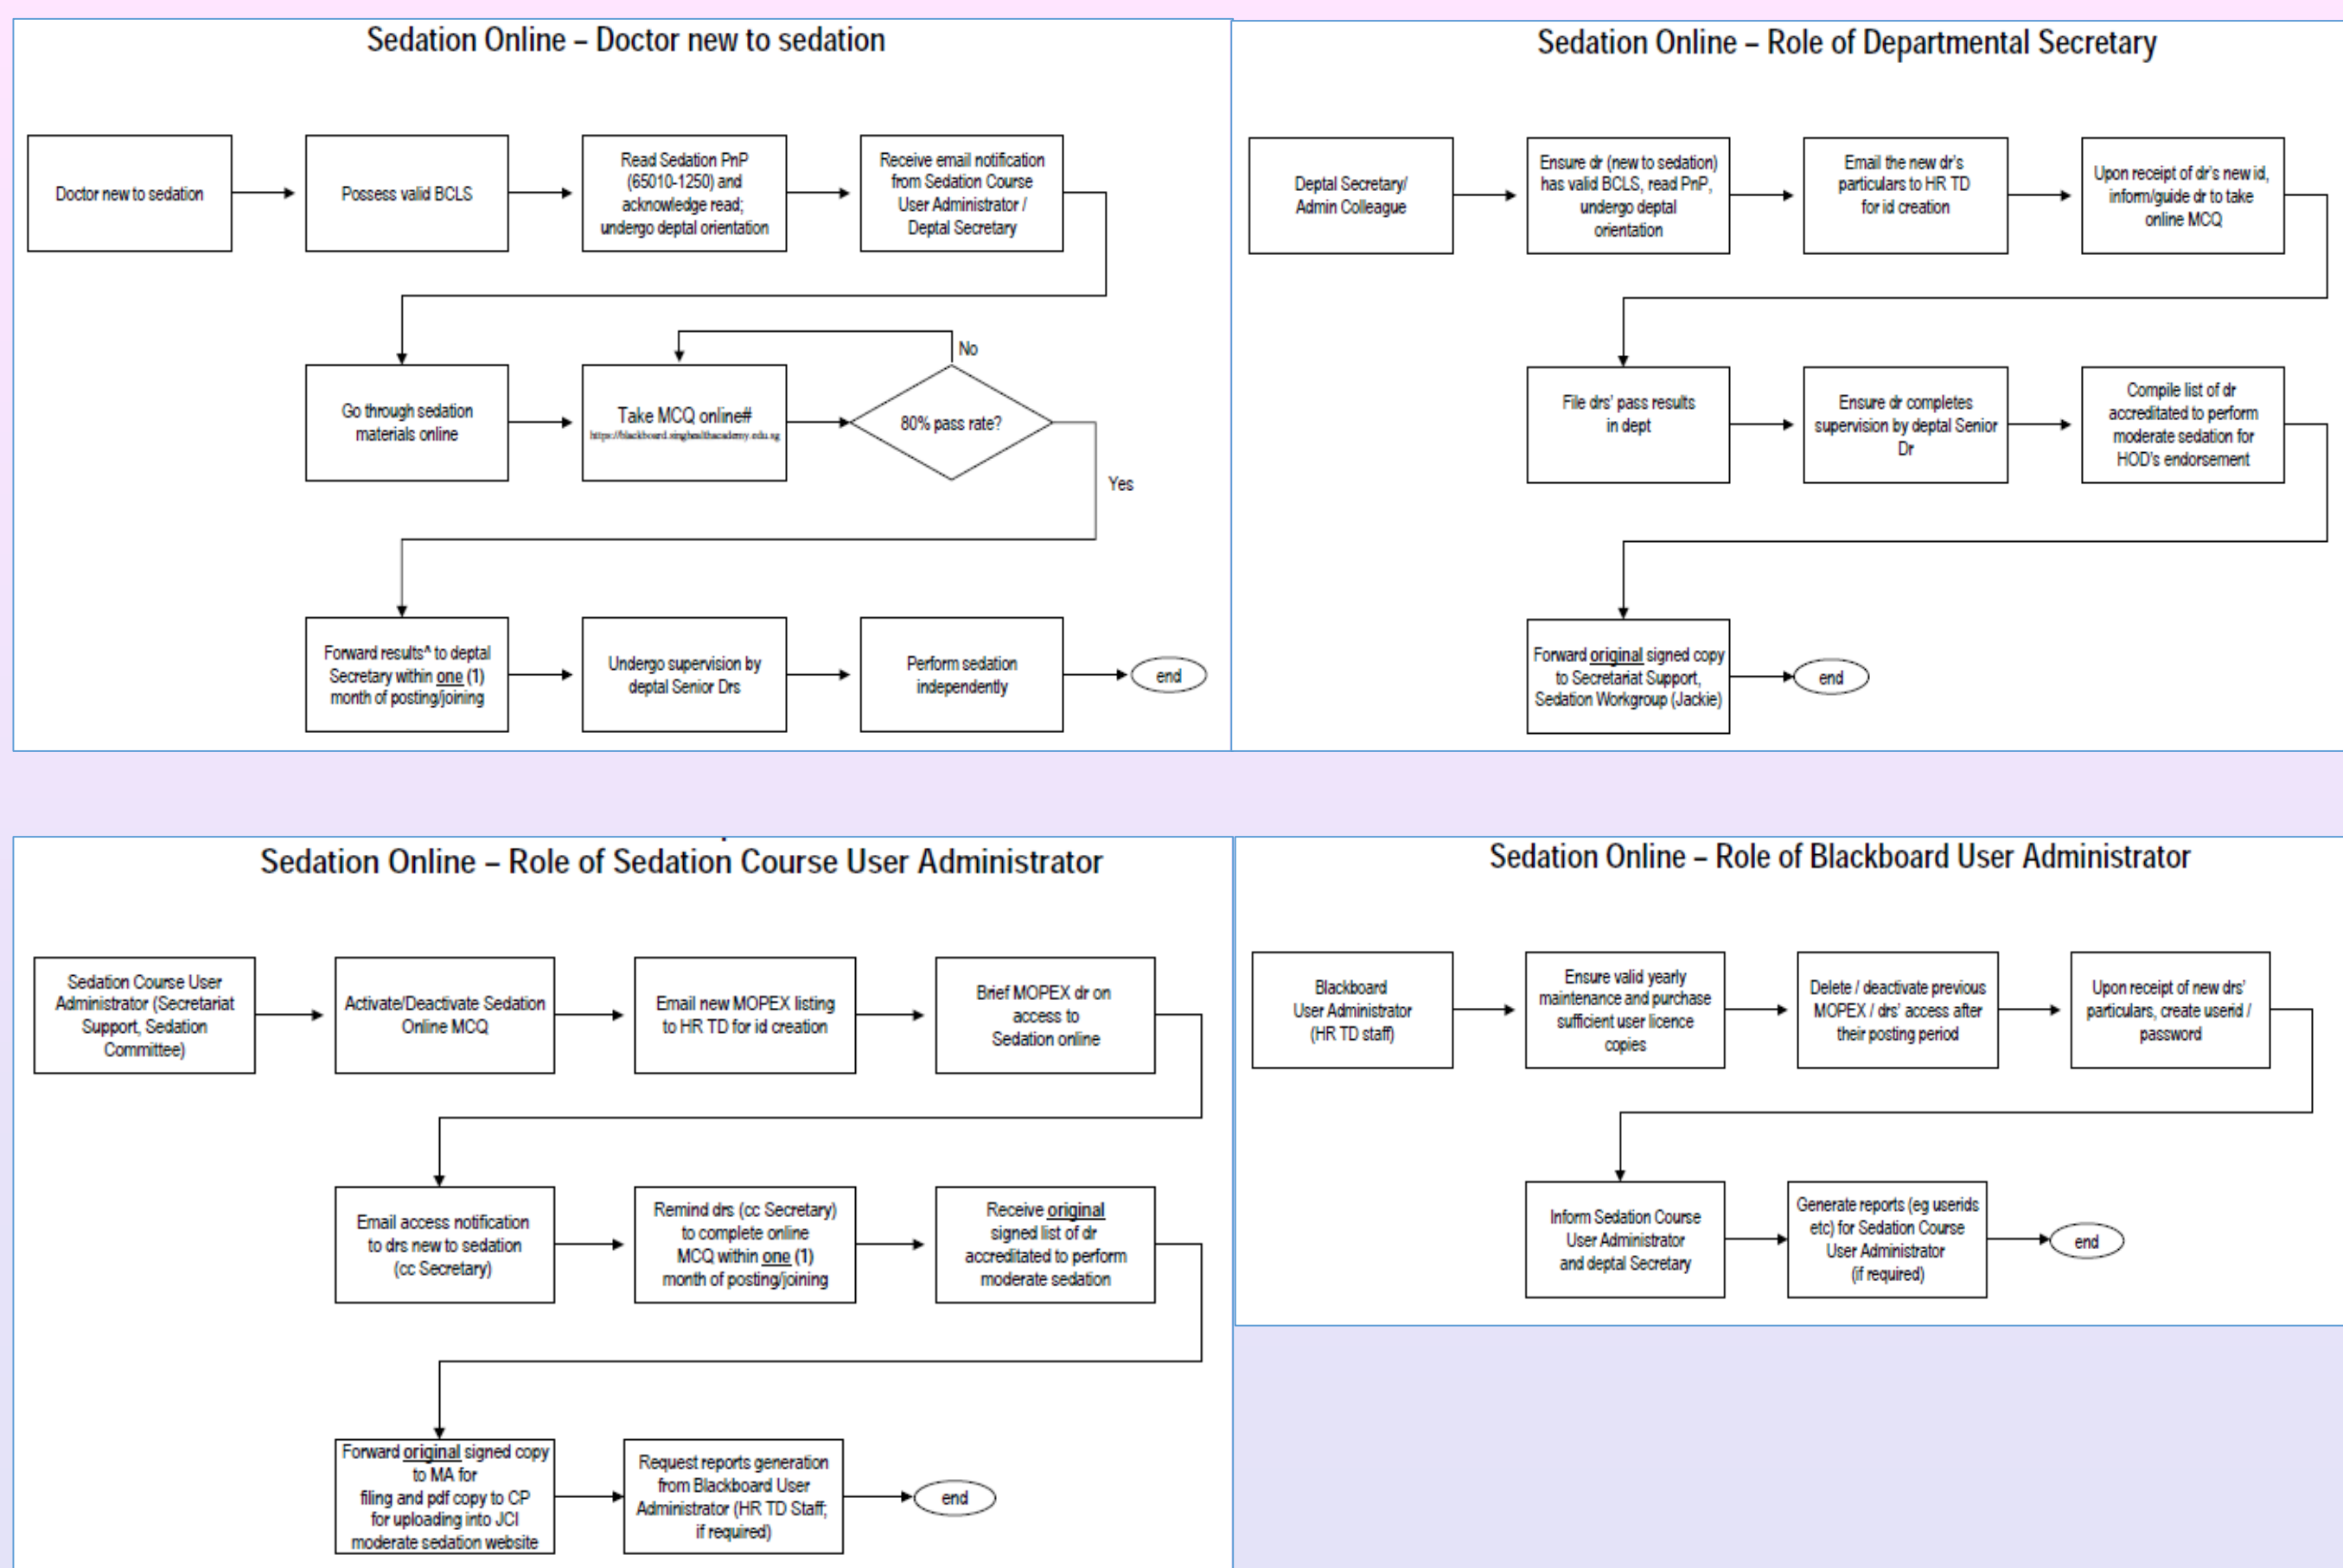

Result

Open access Sedation website was officially launched on 11 September 2014.

Launched on 11/9/2014

★ Quick access to resources!
Many manhours (support functions) saved!

Opens the online learning resources to other staff involved in sedation process

Conclusion

Many manhours were saved and access to vital information in one location are now easily accessible at a click of the mouse.

Decision: To port the Sedation eLearning course to KKH intranet which does not require a password or enrollment.
