

Multi Drug Resistance Organisms (MDROs) Associated with Healthcare Acquired Infections (HAI)

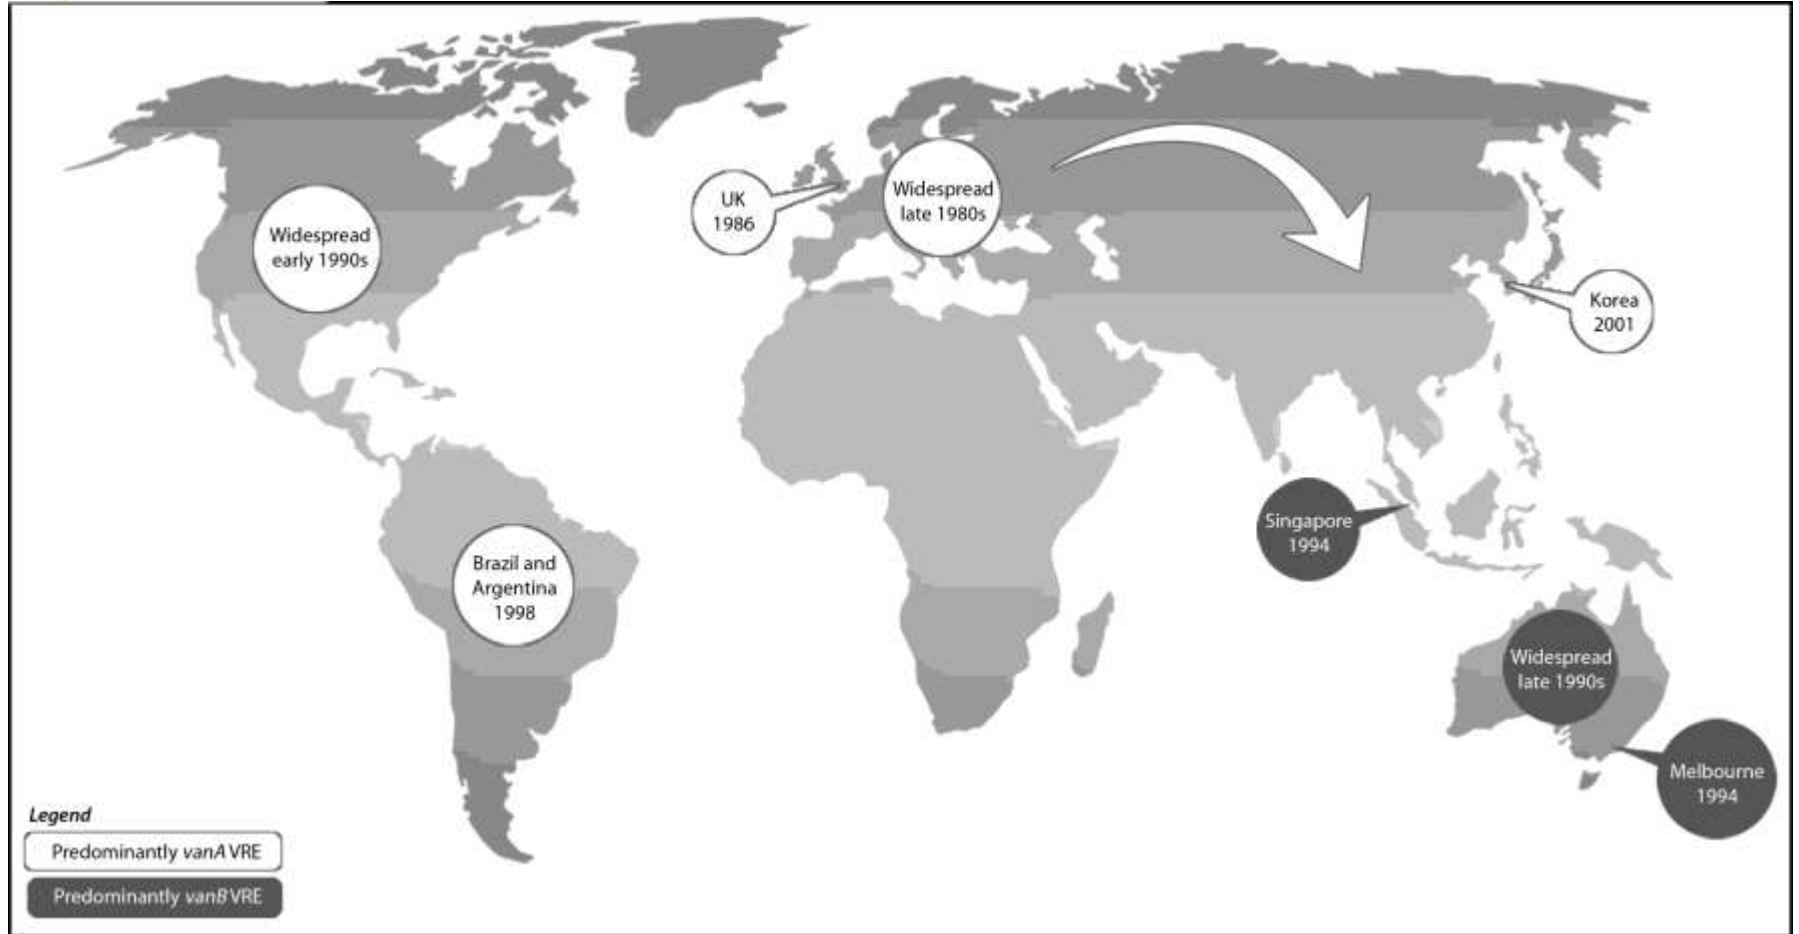

Global spread of MRSA

“25% of all inpatient beds are dedicated to cohorting patients with MRSA infection or colonization and 8% of all inpatients are found to test positive via active surveillance on admission.”

James S. Molton, Paul A. Tambyah, Brenda S. P. Ang, Moi Lin Ling, and Dale A. Fisher. Clinical Infectious Diseases 2013;56(9):1310–8

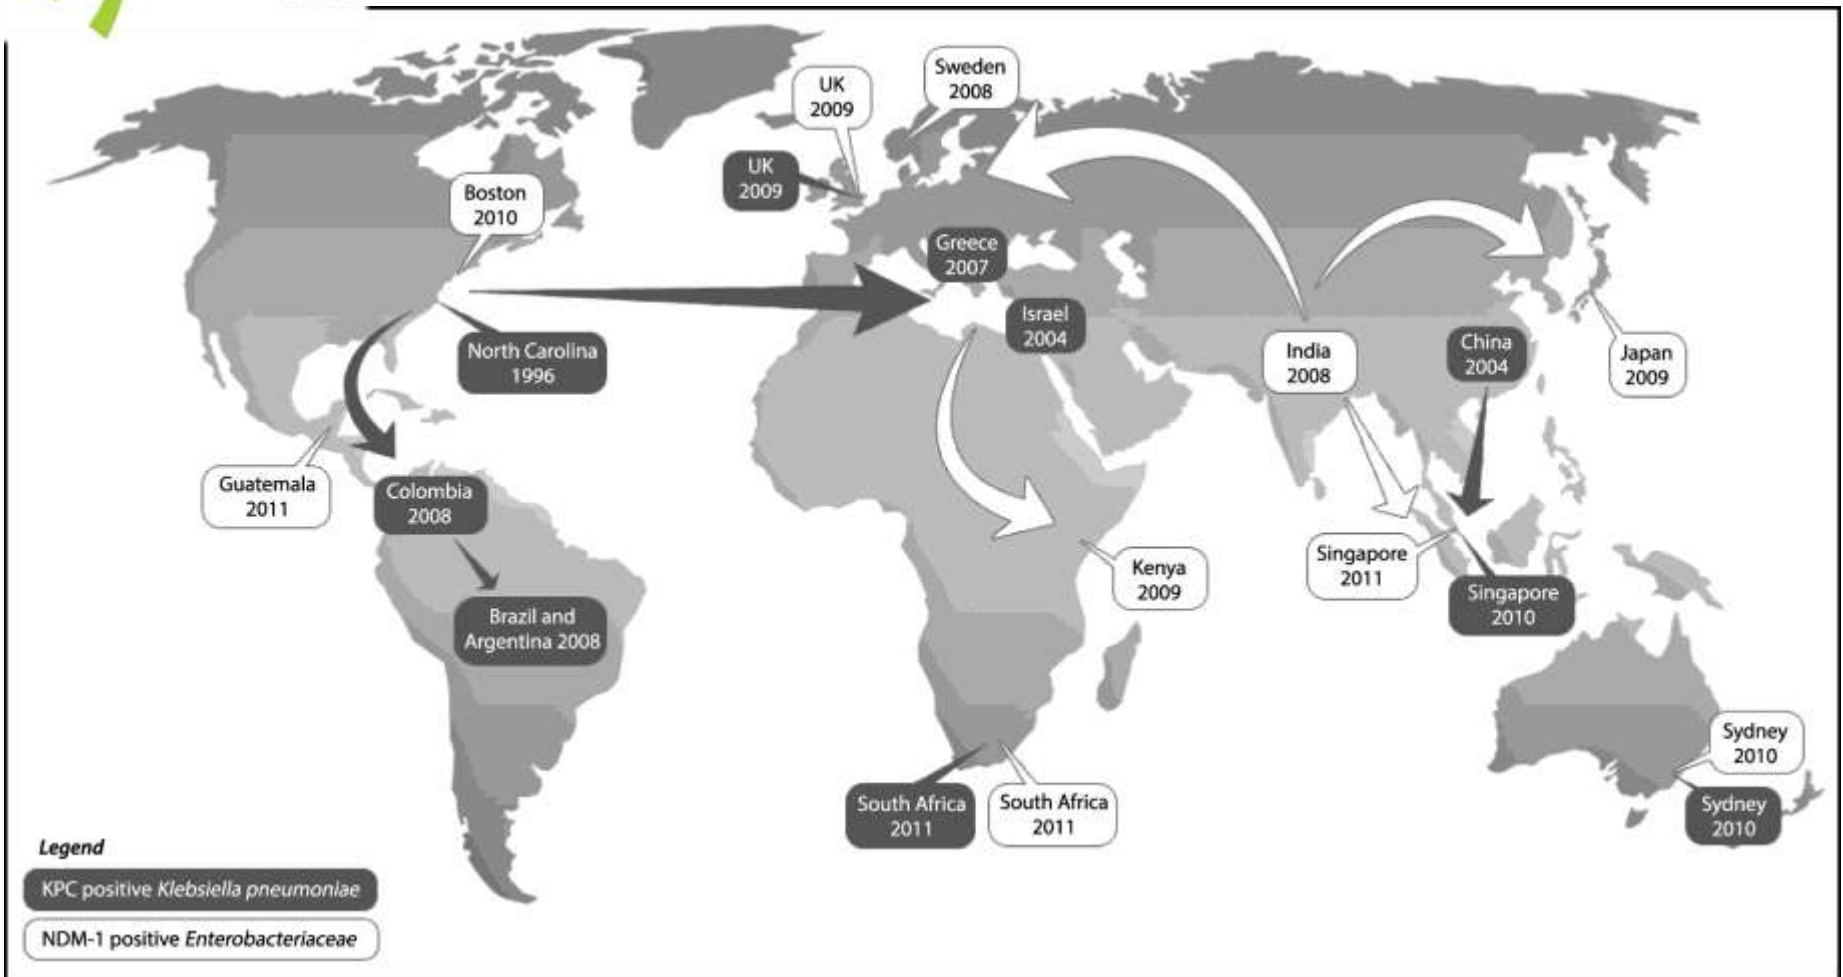

Global spread of VRE

“VRE rates in Singapore’s tertiary hospitals appear to have been trending upward, particularly among renal and hematology patients.”

James S. Molton, Paul A. Tambyah, Brenda S. P. Ang, Moi Lin Ling, and Dale A. Fisher. *Clinical Infectious Diseases* 2013;56(9):1310–8

Global spread of CP-CRE

“Overall, <1% of hospital-associated *Enterobacteriaceae* infections in Singapore are carbapenem resistant, but numbers are increasing.”

James S. Molton, Paul A. Tambyah, Brenda S. P. Ang, Moi Lin Ling, and Dale A. Fisher. *Clinical Infectious Diseases* 2013;56(9):1310–8
