

ASAP-Norway is a Norwegian company that, in cooperation with the healthcare industry, has developed next-generation cover equipment for infection areas, tables and beds where there are special needs in relation to spillage and liquid problems.

By combining new raw materials with new and unique production methods, we achieve exciting product solutions. Our newly developed disposable sheet absorbs 10 liters of liquid per square meter, can lift up to 200 kg, is waterproof and is only 0,7 mm thick.

A large, high-quality photograph of a water splash serves as the background for the lower half of the page. The splash is centered, with a large, clear droplet falling from the top and creating a crown-like shape of water. Numerous smaller droplets are suspended in the air around the main splash. The water surface below is rippled and reflects the light. The overall color palette is a range of blues, from light sky blue to deep ocean blue.

SAY HI TO THE FUTURE
